

—The *Microclinic*: Providing Care at the Worksite—

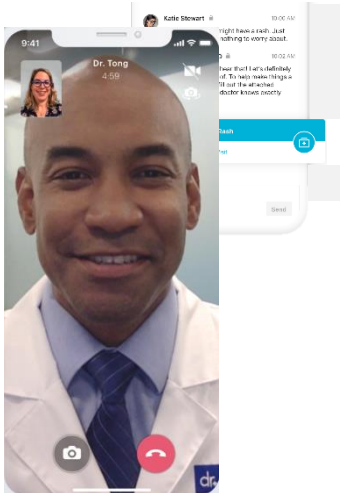

Microclinics are full-time, on-site facilities allowing the small, sub 1500 employee employer to provide on-site care. Utilizing a telemedicine console combined with our team of healthcare professionals and suite of analytics and digital health tools, we provide convenient access to care. The clinics can be installed within the building, in an external unit, or be mobile in a vehicle.

- HHB microclinics can be set up at worksites with as few as 200 employees
- Our microclinics are staffed full time by a HHB technician, and connected to the HHB care team via telemedicine
- We offer the most convenient and accessible primary, urgent, emergent, and chronic care management services
- We leverage a suite of analytics tools to optimize and direct care

—Our Care: Serving as your Shepherd—

The HHB Team of medical professionals is accessible 24/7, at work in person or virtually, or at home on your phone. By establishing a relationship through in person visits with the employee, we ensure that everyone gets the care they need, when the need it, where they need it, and from a team of providers that they, and you can trust.

Services Include:

- Available 24/7
- Primary care
- Urgent & emergent care
- Chronic care management
- Labs
- Preventative & executive physicals
- Smartphone-based video and text visits
- Wellness
- Prescriptions & renewals
- Vaccines
- Claims management
- Referral management
- On-site drug testing
- Preemployment screening
- Advance analytics

— The *Value* to Employees and Employers —

Accessible and convenient healthcare provides long and short term savings to the self-insured employer and their employees, reducing costs, improving outcomes, and increasing satisfaction and creating a culture of care. One employer saw 3.3x ROI in the first 6 months of activity of a HHB microclinic, resulting in a \$75 PMPM reduction.

6 Month Case Study

3.3x

ROI of savings compared to investment

\$75

PMPM reduction compared to the previous year

Return on Investment

- Savings per procedure through competitive pricing
- Accessibility and care direction provide care in the highest value settings, reducing costly ER visits
- Chronic care, referral management and follow ups decrease long-term cost of care

Value on Investment

- Onsite clinics increase employee engagement
- Retention increases, decreasing turnover, increasing productivity and employee satisfaction
- On-site clinics help companies create a culture of care further generating long term value
